Identities

sec x = 1/cos x

csc x = 1/sin x

cot= 1/tan x

Cotangent/tangent

tan x = sin x/cos x

cot x = cos x/sin x

Reciprocal Identities

$\sin\theta = \frac{1}{\csc\theta}$ $\cos\theta = \frac{1}{\sec\theta}$ $\tan\theta = \frac{1}{\cot\theta}$

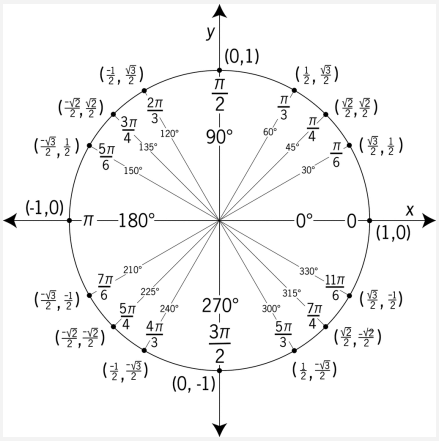
$\csc\theta = \frac{1}{\sin\theta}$ $\sec\theta = \frac{1}{\cos\theta}$ $\cot\theta = \frac{1}{\tan\theta}$

Domain and Range

Domain: The domain of a function is the set of all possible input values (often the "x" variable), which produce a valid output from a particular function. It is the set of all real numbers for which a function is mathematically defined.

Range: The range is the set of all possible output values (usually the variable y, or sometimes expressed as f(x)), which result from using a particular function.

Unit Square

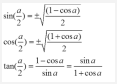


Logarithmic and Exponential Equations

y= ln x

y= b^x

Half-Angle Identities



Double-angle Identities
